

Heart Disease Cured.

WHEN a well known minister after suffering for years with heart disease, is cured, it is not surprising that he should publish the fact for the benefit of others. Rev. J. P. Smith, 1042 Fulton St., Baltimore, Md., writes: "For years I suffered from a severe form of heart disease. I used Dr. Miles' New Heart Cure, and my heart is now in good condition. Recently other ailments came upon me. There was humming, painful sensations on top and back of my head. Fifteen minutes reading would make me almost wild; there were pulling and drawing sensations in my legs all the time, so that I could not sit still. In this condition I began taking Dr. Miles' Restorative. Nervine and its effect was simply wonderful. I heartily commend your remedies." Dr. Miles' Remedies are sold by all druggists under a positive guarantee. First bottle benefits or money refunded. Book on Heart and Nerves sent free to all applicants. DR. With the advent of spring weather will come the opening of business for this season and that merchant is wise who gets in his word to the prospective buyers very early. Do not delay your advertising now but begin at once and "keep ever lastingly at it."

To delay spring advertising now is to lose a good share of spring business. People like to go where they are invited. Why not invite them to your store and induce them to come by letting them know what bargains you are offering them. It will pay you to try it.

At least two distinguished men were in Washington last week.—W. J. Bryan and Robert Fitzsimmons. The latter is said to have attracted much the larger crowd. He was met at the depot by a brass band and escorted to his hotel. Mr. Bryan was not met by the band, but he had his own horn with him which he never neglects to blow.

GREAT minds will differ. Mr. Bryan assumed in his utterances regarding the recent elections that his cause and himself have been vindicated. On the other hand, that sterling democratic paper, the Macon (Ga.) Telegraph, which expresses the sentiments of the genuine southern democracy, says: "The democratic success of Monday shows unmistakably that Bryanism and Albigeldism are done for in this country."

The following interesting bit of information is taken from a correspondent of the Chicago Times Herald:

"During the last twenty five years it has been common to speak of the American flag as 'Old Glory.' I had supposed, as a I presume hundreds of thousands of others have, that General William Tecumseh Sherman gave it that name in one of his speeches on a reunion occasion. He pointed to the flag and said, in substance: 'Boys, it is our flag, the flag of our country; we have had a hand in uplifting and protecting it; that is glory enough for any man; no flag is more glorious. It is our 'Old Glory.'"

The quarrel between Greece and Turkey has developed into full fledged war. Turkey has declared war and Greece has accepted the gage of battle. All day yesterday there was skirmishing for possession of the strong passes in the mountains, and numerous battles with varying success are reported.

The military strength of Greece in land forces 209,422 with 43 war vessels. Turkey's land forces number 367,309 with 12 war vessels. The great disparity in numbers does not represent accurately the strength of the two nations. The probability is that some stronger nations probably Russia, is behind the whole movement. Russia has always wanted a southern outlet to Mediterranean and may be seeking it now by stirring up the broil between Turkey and Greece. The other nations of Europe have heretofore opposed Russia in her efforts and the probability is that some of them will do so at this time.

W. C. T. U. Officers.

At the last meeting of the W. C. T. U. the following officers were elected President, Mrs. Gardiner. Vice President at large, Mrs. Sawyer. Corresponding secretary, Mrs. R. White. Recording secretary, Mrs. Pfaffenberger. Treasurer, Mrs. P. Jones. Vice Presidents, Mrs. S. H. Huffman, Mrs. Keller, Miss Van Horn, Mrs. Schneek and Mrs. Patrick. The society will meet Wednesday afternoon at 2:30. Visitors are cordially invited.

POPOCRATS ALARMED.

Nothing has so alarmed the element which controlled the popocratic organization of last fall as the prospective dissolution of the partnership which then existed. The free silverites see that without the populists their chance of success is absolutely gone, and are terrified that the partnership is to come to an end. Mr. Bryan's special organ, the World Herald, sounds the note of alarm in a recent editorial, in which it urges the continuance of the fusion between democrats, silver republicans, and populists, saying: "Get together. That is good advice to the populists, silver republicans, and democrats. It means the selection of a silver man to the United States senate at the next session of the legislature; it means a solid phalanx of silver followers in all campaigns from now till 1900. It would be worse than folly for the populists to refuse to fuse with the silver republicans and democrats at this time, and the disastrous result would go considerably further than the local campaign."

AFFLIOTED.

John Lowater is carrying his eye in a sling the result of severe cold in the member. Theodore Durham is not nearly so well. His condition causes apprehension. Henry Auferheide left last evening for Brooklyn, N. Y., in response to a telegram stating that his sister, Mrs. Will Corby, was dying.

Deafness Cannot Be Cured.

By local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When the tube gets inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed deafness is the result, and unless the inflammation can be taken out, and this tube restored to its normal condition or hearing will be destroyed forever, nine cases out of ten are caused by catarrh, which is nothing but an inflamed condition of the mucous surfaces. We will give One Hundred Dollars for any case of deafness caused by catarrh that cannot be cured by Hall's Catarrh Cure. Send for circulars, free. F. J. CHENEY & CO., Props., Toledo, O. Sold by druggists, 75 cents. Hall's Family Pills are the best.

Over One Hundred Thousand People Visit His Last Resting Place.

NEW YORK, April 19.—Pedestrians, carriages and bicyclists thronged Riverside drive yesterday, and it is estimated that over 100,000 people visited Grant's tomb. The crowd came early and stayed late, and not until the bronze doors of the mausoleum were closed at 5:30, did the crowd diminish to any extent on the plaza in front of the monument. The weather was perfect and the crowd moved orderly. A number of prominent people had tickets admitting them to the interior of the monument.

YARD SWITCHMAN ROBERT LONG THE VICTIM.

Fell Under a Moving Train, Five Cars Passing Over Him.—Lived About Four Hours After the Accident.

About 9:30 o'clock yesterday morning Yard Switchman Robert Long met with an accident that cost his life. No. 98, a freight train, came in from the west and was passing the B. & O. S. W. depot. Long attempted to board the engine and ride to the yard and there cut the engine off. He made a miss catch and fell. The tender and four or five cars passed over him before he could be drawn out by parties standing near.

In a few minutes he was placed on a litter and carried to the office of Dr. C. Sey where it was found that the right leg was crushed from the ankle to the hip and the left leg from the ankle to the knee. His head was also seriously bruised and cut. The attending physicians gave him all relief possible but he was fatally hurt. He died a few minutes before 2 o'clock, remaining conscious until within a half hour of his death.

Robert Long was 29 years of age, was born in Louisville, but lived in Seymour after he was seven years old. Less than a year ago he had three of his fingers cut off while making a coupling. He was held in high esteem by his many friends.

The funeral services will be conducted at the house on Cincinnati avenue tomorrow afternoon at 2 o'clock by Rev. J. M. Baxter. Interment in Riverview cemetery.

W. M. Repine, editor Tiskilwa, Ill., "Chief" says: "We won't keep house without Dr. King's New Discovery for consumption, coughs and colds. Experimented with many others, but never got the true remedy until we used Dr. King's New Discovery. No other remedy can take its place in our home, as in it we have a certain and sure cure for coughs, colds, whooping cough, etc." It is idle to experiment with other remedies, even if they are urged on you as just as good as Dr. King's New Discovery. Great Treat for the Children.

Prof. Gentry's school of performing dogs and ponies, who are to exhibit under a tent in this city on West Second street, Tuesday, April 20, afternoon at 3 and night at 8, will be a great treat for the little folks. The exhibition, while it is especially attractive to the children is equally enjoyed by the older people, the acts being so arranged that while older ones realize the enormous amount of time, labor and patience that it must have required to educate the animals to that degree of intelligence, the younger ones enjoy the general result. The show is decidedly the best of its kind in the world, and never fails to give the best of satisfaction. The entertainment is strictly moral and enjoys the distinction of being the only show traveling under canvas that interferes in no way with any belief, creed or religion and is endorsed by the clergy and school superintendents wherever it exhibits. The prices of admission are, children, 15 cents; adults, 25 cents.

John P. McLean's
Great Newspaper.

Without a single exception, there is no newspaper in the United States that has been more successful than the Cincinnati Enquirer. Mr. John P. McLean, its publisher, has maintained, and its circulation largely increased each year; hard times and cheaper journals failing to arrest its onward march and high appreciation of the public for its true worth and merit.

The Weekly Enquirer at beginning of the campaign year was offered at 50 cents a year, and its circulation increased by the addition of over 200,000 new subscribers; the most substantial and covered testimonial a publisher could desire.

When asked for the secret of such success, Mr. McLean frankly answers: The Enquirer has no opinions to force upon its patrons, it simply prints the facts and tells the truth that the reader may form his own opinions. By maintaining the price of the paper, more news and greater variety can be furnished, and every class of business interests catered to, which a cheaper journal cannot afford.

The very liberal support given the Enquirer by the public at large, makes incumbent upon the management to serve it faithfully with zeal and enterprise in minor matters as well as those of greater magnitude.

Dangers of the Grip.

The greatest danger from lagrippe is of its resulting in pneumonia. If reasonable care is used, however, and Chamberlain's Cough Remedy taken, all danger will be avoided. Among the tens of thousands who have used this remedy for la grippe, we have yet to learn of a single case having resulted in pneumonia, which shows conclusively that this remedy is a certain preventative of that dread disease. It will effect a permanent cure in less time than any other treatment. The 25 and 50 cent sizes for sale by C. W. Milbous, druggist.

Our Mayor a Bicyclist.

Not every city has a mayor who can ride a bicycle. A great many cities have mayors who have wheels—wheels that run with great speed at times but only in their heads. Our mayor has no such machinery. He is a wheelman, however, and is the sole owner of a new "Success" bicycle, and knows how to ride it too. He rides with as much ease as any young man in town.

HOUSES BUILT IN TREES.

New Guinea Claims the Distinction of Furnishing This Unique Spectacle.

Man was indubitably at one period of his existence an arboreal animal. He had much to do with "the trees of the garden." In some places and as represented by some races he still lives among them.

The natives of New Guinea climb like monkeys and travel for long distances from one tree to another without descending to the ground. The birds build little fairylike cabins on the ground, but the people construct their houses in the top of the tallest forest trees. First a native, having climbed the great trunk of the teak or cedar or oak tree he has selected, begins by cutting off some of the branches the right length to support a platform of bamboo on which his house is to rest. You would wonder how he could do anything with the tools he uses if you should see them. He has no saw or steel edged ax, but only a sort of tomahawk made of stone and knives of bone or hard wood. When, however, he has in some way managed to get the limbs of his tree so cut and fashioned as to support his house, his hardest work is done.

The house itself is soon built and is made of bamboo strips and thatched with palm leaves. All parts are firmly lashed together with strips of rattan palm, a very tough vine, used by the natives in place of ropes. It is not a large house, though it sometimes contains several rooms, but it is a safe and secure retreat for the women and children in case of a sudden attack by hostile tribes.

The house is reached from the ground by a long ladder or inclined plane, made of woven vines. In case an enemy appears the ladder is drawn up, and the man and his family and the pig are safe within the house. The elevation not only secures the household from wild beasts and from the ants that roam the country, seeking what they may devour, but also from disease germs, which, like those of yellow fever, do not rise above a certain level. The breeze, too, rocks the house gently, like a cradle, and sets the fresh air into circulation, making it delightfully refreshing after the sultry heats below.

If you should climb the long ladder and peep in at the door, you will find the family, perhaps, all asleep sitting about the floor eating yams, coconuts and bananas, and sharing them with their pet pigs, parrots or poultry. You will find there no pictures, toys or playthings, such as even the poorest children among us possess; no music and no books, no furniture in the room, not even a bed and no mats on the floor.

Many a true built nest is constructed with more art and is more comfortable for the little ones who are born in it, and is far prettier than the rude huts of the wild men of New Guinea.—Philadelphia Inquirer.

THE SUN'S DISTANCE.

Would Take Five Hundred Years to Cover It at a Swift Steamer's Pace.

"The sun is about 93,000,000 miles distant from the earth," writes Alden W. Quimby in Ladies' Home Journal. "It varies through the year because the earth's orbit is elliptical, and the sun is at one focus of the ellipse. The earth is more than 3,600,000 of miles nearer the sun in December than in June, at which time the latitudes south of the equator receive his direct rays and experience the great heat of their summer."

"Let us try to comprehend the figures stated. The other day two racers of the sea proudly lowered the record of transatlantic passage. Could they turn their backs to the sun, and drive their great engines day and night in the crossing of the ether main, it would be 500 years before they could reach harbor."

"Most persons have noticed the appreciable interval of time between the stroke of an ax at a distance and the resultant sound. Could we hear the sound of a solar explosion we would know that the explosion had occurred 14 years before. Perhaps the most striking illustration is that which imagines a little child to have an arm long enough to reach the sun. The child might thrust its fingers into the seething fires, but it would grow up to maturity and calmly descend into the valley of extreme old age, blissfully unconscious of any pain from the burning; in fact, it would require another such lifetime to bring the news to the brain."

Birds That Feign Death.

One of the most remarkable devices resorted to by wild things for their own protection is that of shamming death. A beetle or spider will double in its legs and lie as if dead. The reason for this is obvious. It may then be passed over, mistaken for a bit of leaf or stick. But it is more difficult to account for this practice in birds.

A moor hen or land rail will feign death, lying in the hand perfectly limp and to all appearances unconscious. It has been suggested that the idea is that, being already dead, the captor will not trouble to kill them.

More probably it is merely a ruse in the hope that by lying still they may be forgotten and crawl off presently unobserved. Another reason is suggested by the fact that cats and the cat tribe do not often touch their prey unless it moves.—London Standard.

A Double Purpose.

Get into the habit of walking with the eyes cast thoughtfully on the ground. It gives people the impression that you are a deep thinker, and you may be able to pick up articles of value that others have lost.—Athenian Globe.

Companions of the noble orders take rank immediately after the knights of the same order, their precedence among themselves being arranged by a complicated but well understood system.

Many books require no thought from those who read them, and for a simple reason—they make no such demand upon those who wrote them.—Colton.

Julian Scott, Drummer Boy.

The Boston Transcript says that Julian Scott, drummer boy, Company E, Third Vermont volunteers, "received the first congressional medal of honor for bravery at the battle of Lee's Mills, Va., April 16, 1862. His duties did not require him to be present on the field. Learning that four companies of his regiment, including his own, had crossed the creek and were suffering terrible losses, and that many of his comrades were killed and wounded, he started for the scene, forded the creek, and, in the face of a terrible fire and countercharge from the enemy, succeeded unaided in bringing two severely wounded comrades across the creek. A general order was issued by his brigade commander, General 'Baldy' Smith, commending the heroic bravery of this drummer boy. The act of congress granting the medal of honor was passed July 12, 1862, and it is reported that Secretary Stanton was so pleased with the bravery of this boy that as soon as the medals were ready he sent the first one to Julian Scott."

THE BANK OF FRANCE.

There is one institution in France which has hitherto contrived to withstand all the numerous and revolutionary changes of government—namely, the Bank of France, which owes its origin to the first Napoleon. The question as to the renewal of its charter came up recently for discussion in the legislature, which voted its prolongation. Since the foundation of the bank it has had but ten governors, while France has during the same period of time had no less than 9 different regimes and considerably over 100 cabinets.

Our Only Fortress.

The only fortress in the United States is Fortress Monroe, at Old Point Comfort, in Virginia. It was built for the purpose of defending the naval yard of Norfolk against any possible attack. Its area is about 80 acres, surrounded by a moat filled with water from 8 to 15 feet deep and from 75 to 100 feet wide.

HOW TO FIND OUT.

Fill a bottle or common water glass with urine and let it stand twenty-four hours; a sediment or settling indicates a diseased condition of the kidneys. When urine stains linen it is positive evidence of kidney trouble. Too frequent desire to urinate or pain in the back, is also convincing proof that the kidneys and bladder are out of order.

What to do.

There is comfort in the knowledge so often expressed, that Dr. Kilmer's Swamp Root, the great kidney remedy, cures every wish in relieving pain in the kidneys, liver, bladder and every part of the urinary passages. It corrects inability to hold urine and scalding pain passing it or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to get up many times during the night to urinate. The mild and extraordinary effect of Swamp Root is soon realized. It stands the highest for its wonderful cures of the most distressing cases. If you need a medicine you should have the best. Sold by druggists price fifty cents and one dollar. For a sample bottle and pamphlet, both sent free by mail, mention the Seymour Republican, and send your full post-office address to Dr. Kilmer & Co., Binghamton, N. Y. The proprietors of this paper guarantee its genuineness.

DON'T.

The United States Postal department has sent Postmaster Price quite a bunch of circulars reading as follows:

"Don't mail your letter for valuable package without having your own address written or printed upon the upper left hand corner."

"This will insure its return to you if not delivered, and will prevent its being sent to and opened at the Dead Letter office."

The REPUBLICAN will furnish you envelopes with your return notice printed on them cheaper than you buy the envelopes in small quantities. Call at the office and see samples.

With the advent of spring weather will come the opening of business for this season and that merchant is wise who gets in his word to the prospective buyers very early.

To delay spring advertising now is to lose a good share of spring business. People like to go where they are invited.

At least two distinguished men were in Washington last week.—W. J. Bryan and Robert Fitzsimmons. The latter is said to have attracted much the larger crowd.

GREAT minds will differ. Mr. Bryan assumed in his utterances regarding the recent elections that his cause and himself have been vindicated.

The following interesting bit of information is taken from a correspondent of the Chicago Times-Herald:

UNDER THE WHEELS.

YARD SWITCHMAN ROBERT LONG THE VICTIM.

Fell Under a Moving Train, Five Cars Passing Over Him.—Lived About Four Hours After the Accident.

About 9:30 o'clock yesterday morning Yard Switchman Robert Long met with an accident that cost him his life. No. 98, a freight train, came in from the west and was passing the B. & O. S. W. depot, Long attempted to board the engine and ride to the yard and there cut the engine off. He made a miss catch and fell. The tender and four or five cars passed over him before he could be drawn out by parties standing near.

In a few minutes he was placed on a litter and carried to the office of Dr. C. Sey where it was found that the right leg was crushed from the ankle to the hip and the left leg from the ankle to the knee. His head was also seriously bruised and cut. The attending physicians gave him all relief possible but he was fatally hurt. He died a few minutes before 2 o'clock, remaining conscious until within a half hour of his death.

Robert Long was 29 years of age, was born in Louisville, but lived in Seymour after he was seven years old. Less than a year ago he had three of his fingers cut off while making a coupling. He was held in high esteem by his many friends.

The funeral services will be conducted at the house on Cincinnati avenue tomorrow afternoon at 2 o'clock by Rev. J. M. Baxter. Interment in Riverview cemetery.

Experimented with many others, but never got the true remedy until we used Dr. King's New Discovery. No other remedy can take its place in our home, as it has a certain and sure cure for coughs, colds, whooping cough, etc." It is idle to experiment with other remedies, even if they are urged on you as just as good as Dr. King's New Discovery. Great Treat for the Children.

Prof. Gentry's school of performing dogs and ponies, who are to exhibit under a tent in this city on West Second street, Tuesday, April 20, afternoon at 3 and night at 8, will be a great treat for the little folks. The exhibition, while it is especially attractive to the children is equally enjoyed by the older people, the acts being so arranged that while older ones realize the enormous amount of time, labor and patience that it must have required to educate the animals to that degree of intelligence, the younger ones enjoy the general result. The show is decidedly the best of its kind in the world, and never fails to give the best of satisfaction. The entertainment is strictly moral and enjoys the distinction of being the only show traveling under canvas that interferes in no way with any belief, creed or religion and is endorsed by the clergy and school superintendents wherever it exhibits. The prices of admission are, children, 15 cents; adults 25 cents.

John P. McLean's Great Newspaper.

There is no single exception, there is no paper in the United States that is more successful publisher than the Cincinnati Enquirer, Mr. John P. McLean.

The old-time prices for the Daily Enquirer have been maintained, and its circulation largely increased each year; hard times and cheaper journals failing to arrest its onward march and high appreciation of the public for its true worth and merit.

The Weekly Enquirer at beginning of the campaign year was offered at 50 cents a year, and its circulation increased by the addition of over 200,000 new subscribers; the most substantial and coveted testimonial a publisher could desire.

When asked for the secret of such success, Mr. McLean frankly answers: The Enquirer has no opinions to force upon its patrons, it simply prints the facts and tells the truth that the reader may form his own opinions. By maintaining the price of the paper, more news and greater variety can be furnished, and every class of business interests catered to, which a cheaper journal cannot afford.

The very liberal support given the Enquirer by the public at large, makes incumbent upon the management to serve it faithfully with zeal and enterprise in minor matters as well as those of greater magnitude.

Dangers of the Grip.
The greatest danger from lagrippe is of its resulting in pneumonia. If reasonable care is used, however, and Chamberlain's Cough Remedy taken, all danger will be avoided. Among the tens of thousands who have used this remedy for la grippe, we have yet to learn of a single case having resulted in pneumonia, which shows conclusively that this remedy is a certain preventative of that dread disease. It will effect a permanent cure in less time than any other treatment. The 25 and 50 cent sizes for sale by C. W. Milhous, druggist.

Our Mayor a Bicyclist.

Not every city has a mayor who can ride a bicycle. A great many cities have mayors who have wheels—wheels that run with great speed at times but only in their heads. Our mayor has no such machinery. He is a wheelman, however, and is the sole owner of a new "Success" bicycle, and knows how to ride it too. He rides with as much ease as any young man in town.

HOUSES BUILT IN TREES.

New Guinea Claims the Distinction of Furnishing This Unique Spectacle.

Man was indubitably at one period of his existence an arboreal animal. He had much to do with "the trees of the garden." In some places and as represented by some races he still lives among them.

The natives of New Guinea climb like monkeys and travel for long distances from one tree to another without descending to the ground. The birds build little fairylike cabins on the ground, but the people construct their houses in the top of the tallest forest trees. First a native, having climbed the great trunk of the tree or cedar or oak tree he has selected, begins by cutting off some of the branches the right length to support a platform of bamboo on which his house is to rest. You would wonder how he could do anything with the tools he uses if you should see them. He has no saw or steel edged ax, but only a sort of tomahawk made of stone and knives of bone or hard wood. When, however, he has in some way managed to get the limbs of his tree so cut and fashioned as to support his house, his hardest work is done.

The house itself is soon built and is made of bamboo strips and thatched with palm leaves. All parts are firmly lashed together with strips of rattan palm, a very tough vine, used by the natives in place of ropes. It is not a large house, though it sometimes contains several rooms, but it is a safe and secure retreat for the women and children in case of a sudden attack by hostile tribes.

The house is reached from the ground by a long ladder or inclined plane, made of woven vines. In case an enemy appears the ladder is drawn up, and the man and his family and the pig are safe within the house. The elevation not only secures the household from wild beasts and from the ants that roam the country, seeking what they may devour, but also from disease germs, which, like those of yellow fever, do not rise above a certain level. The breeze, too, rocks the house gently, like a cradle, and sets the fresh air into circulation, making it delightfully refreshing after the sultry heats below.

If you should climb the long ladder and peep in at the door, you will find the family, perhaps, all asleep or sitting about the floor eating yams, coconuts and bananas, and sharing them with their pet pigs, parrots or poultry. You will find there no pictures, toys or playthings, such as even the poorest children among us possess; no music and no books, no furniture in the room, not even a bed and no mats on the floor.

Many a true built nest is constructed with more art and is more comfortable for the little ones who are born in it, and is far prettier than the rude huts of the wild men of New Guinea.—Philadelphia Inquirer.

THE SUN'S DISTANCE.
Would Take Five Hundred Years to Cover It at a Swift Steamer's Pace.

"The sun is about 93,000,000 miles distant from the earth," writes Alden W. Quimby in Ladies' Home Journal. "It varies through the year because the earth's orbit is elliptical, and the sun is at one focus of the ellipse. The earth is more than 3,600,000 miles nearer the sun in December than in June, at which time the latitudes south of the equator receive his direct rays and experience the great heat of their summer. Let us try to comprehend the figures stated. The other day two racers of the sea proudly lowered the record of transatlantic passage. Could they turn their bows to the sun, and drive their great engines day and night in the crossing of the ether main, it would be 500 years before they could reach harbor."

"Most persons have noticed the appreciable interval of time between the stroke of an ax at a distance and the resultant sound. Could we hear the sound of a solar explosion we would know that the explosion had occurred 14 years before. Per as the most striking illustration of this is obvious. It may then be passed over, mistakes for a bit of leaf or stick. But it is more difficult to account for this practice in birds."

Birds That Feign Death.

One of the most remarkable devices resorted to by wild things for their own protection is that of shamming death. A beetle or spider will double in its legs and lie as if dead. The reason for this is obvious. It may then be passed over, mistakes for a bit of leaf or stick. But it is more difficult to account for this practice in birds."

A moor hen or land rail will feign death, lying in the hand perfectly limp and to all appearances unconscious. It has been suggested that the idea is that, being already dead, the captor will not trouble to kill them.

More probably it is merely a ruse in the hope that by lying still they may be forgotten and crawl off presently unobserved. Another reason is suggested by the fact that cats and the cat tribe do not often touch their prey unless it moves.—London Standard.

A Double Purpose.

Companions of the noble orders take rank immediately after the knights of the same order, their precedence among themselves being arranged by a complicated but well understood system.

Many books require no thought from those who read them, and for a simple reason—they made no such demand upon those who wrote them.—Colton.

DON'T.
The Boston Transcript says that Julian Scott, drummer boy, Company E, Third Vermont volunteers, "received the first congressional medal of honor for bravery at the battle of Lee's Mills, Va., April 16, 1862. His duties did not require him to be present on the field. Learning that four companies of his regiment, including his own, had crossed the creek and were suffering terrible losses, and that many of his comrades were killed and wounded, he started for the scene, forded the creek, and, in the face of a terrible fire and countercharge from the enemy, succeeded unaided in bringing two severely wounded comrades across the creek. A general order was issued by his brigade commander, General 'Baldy' Smith, commending the heroic bravery of this drummer boy. The act of congress granting the medal of honor was passed July 12, 1862, and it is reported that Secretary Stanton was so pleased with the bravery of this boy that as soon as the medals were ready he sent the first one to Julian Scott."

How to Find Out.
Fill a bottle or common water glass with urine and let it stand twenty-four hours; a sediment or settling indicates a diseased condition of the kidneys. When urine stains linen it is positive evidence of kidney trouble. Too frequent desire to urinate or pain in the back, is also convincing proof that the kidneys and bladder are out of order.

What to do.
There is comfort in the knowledge often expressed, that Dr. Kilmer's Swamp Root, the great kidney remedy, affords every wish in relieving pain in back, kidneys, liver, bladder and every part of the urinary passages. It corrects inability to hold urine and scalding pain passing it or bad effects following use of liquor, wine or beer, and overcomes that unpleasant necessity of being compelled to get up many times during the night to urinate. The mild and extraordinary effect of Swamp Root is realized. It stands the highest for its wonderful cures of the most distressing cases. If you need a medicine you should have the best. Sold by druggists price fifty cents and one dollar. For a sample bottle and pamphlet, both sent free by mail, mention the Seymour Republican, and send your full post-office address to Dr. Kilmer & Co., Binghamton, N. Y.
